ST. MARY'S RIVER – West Neebish Channel – Shoaling – Chart 14883

A strike was reported Saturday evening, 30 May 2003 from the Steamer MIDDLETOWN in the upper end of the Rock Cut area of Course 6 West Neebish Channel below Light 29. During a sweep survey of the general area on 2 June 2003, the Survey Launch Bufo detected several small shoals in an 80 square foot area 12 feet east of the centerline and 600 feet above Light 29, with the maximum elevation being 0.5 feet above the 28.5-foot project depth. This was the only shoal reported by the S/L BUFE working the area 800 feet above Light 29 to 1500 feet below Light 29. The U.S. Army Corps of Engineers D/B NICOLET is currently working in the Rock Cut to remove this area of obstructions. U.S. Army Corps of Engineers Floating Plant will continue to perform shoal removal operations for approximately two weeks in Course 6 of West Neebish Channel until shoals are cleared to the project depth of 28.5 feet. [14/03]

IV. CHART CORRECTIONS since LNM 18/03

Corrective action affecting charts is contained in this section. Chart corrections are listed numerically by chart number. The correction listed pertains to that chart only. It is up to the mariner to decide what charts are to be corrected. The following example explains the individual elements of a typical correction.

Chart number	Chart edition	Edition date	Last Local Notice to Mariners	Reference datum	Source Agency of correction	Current Notice to Mariners
14922	17th ed. MANITOWOC AND SHEBOYGAN HARBORS Change	4/25/92	Last LNM 12/93	NAD 83	(CGD9)	17/93

		Manitowoc South Breakwater Light to "3" Fl G 2.5s, 37ft 8 StM			44°05'29.00"N	087°38'37.00"W

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. (Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000° true. Bearings of light sectors are toward the light from lakeward.

VII. GENERAL NOTICES

ST. MARY'S RIVER – Sault Ste. Marie, MI – Pier Repairs – Chart 14884

The Ryba Marine Construction Company has commenced pier repairs of a 300 ft section of the west Center Pier of the railroad bridge in the South Canal on 01 July 03. It is estimated that work will continue into the fall long as weather permits. The work will require divers and barges along the southern face of the West Center Pier of the Soo Locks Complex in Sault Ste. Marie, MI. A 40 foot wide barge will be routinely moored to the pier. During placement of concrete the barge width will increase to 93ft. An underwater obstruction will be placed along the base of the pier within the work area. This will protrude 10ft into the channel. Operations will run 24 hours a day, 7 days a week. Down bound traffic will be required to make winter landings to avoid the work area. Upbound traffic will need to maneuver clear of the work area. The tug ROCHELLE KAYE and crew boat ALCONA can be contacted via channels 13 and 14 VHF-FM radio. For further information, contact Darrell Wallace at (231) 627-4333. Surpasses 18/03 [19/03]

LAKE MICHIGAN – IL – Calumet Harbor, Bridge Maintenance-Clearance Reduction-Advance Notice, Chart 14929

Contractors will be performing structural steel replacement and other rehabilitation work on the Chicago Skyway bridge at mile 1.50 over Calumet River between November 1, 2002, and July 31, 2003. Work platforms will be placed under the bridge that extend no more than 2 feet below low steel. A 150' x 40' work barge may be under the bridge between the hours of 0600 and 1800, 7 days a week, during the period. The barge will move for passing vessel traffic, if necessary, if at least 1-hour advance notice is provided prior to passing. Mariners should contact "Chicago Skyway Bridge" on VHF-FM channel 16, or call the Project Field Office at (773) 375-2647 to provide advance notice. The barge will be moved from the navigation channel during non-work hours. [19/03]

LAKE MICHIGAN – IL – Calumet Harbor, Cal-Sag Channel, Bridge Maintenance-Clearance Reduction, Chart 14929

Contractors will be constructing caissons for the new Tri-State Tollway (I-294) bridge at mile 17.35 over Cal-Sag Channel in Cook County, IL, between April 11 and August 10, 2003. Work barges will be placed alongside one pier at a time during this period, and may be working in the channel 24 hours, Monday through Saturday. Barges in the channel will move for passing vessels if at least 30-minutes advance notice is provided prior to intended time of passage during those hours. The barges will be pulled alongside the pier and lighted at night and during non-work hours. When the barges are pulled alongside the pier, the horizontal clearance is reduced by 40 feet, but a clear channel of approximately 145 feet on centerline will be maintained. Mariners may contact "Gillen Barge #3 at Tri-State Tollway bridge" on VHF-FM channels 8 or 16, or call Mr. Dan Zirbel at (414) 788-4519, or Mr. Tom Miller at (414) 769-3120, to provide advance notice. The contractor will make announcements on channel 16 at the beginning and end of periods when the work barge will be operating in the channel. After this phase of work, the contractor will have a work barge with crane in the channel for steel beam raising. This phase is expected to take place between August 11 and September 6, 2003, between the hours of 0700 and 1800, Monday through Saturday. During these work hours, mariners must continue to provide 30-minute advance notice. There will be periods up to 2-hours at a time where the crane will be raising steel beams, with 6 beams total. The contractor will announce the anticipated times on VHF-FM radio the day before, and on the morning when they expect to do this work. Vessels will not be able to pass once until a raised beam is safely put in place and the barge moved. Mariners should listen for anticipated closure times, and contact the contractor at the numbers above to coordinate times of passage. [19/03]
